

Paul Russell, Ph.D. CChem MRSC, gained a BSc in Chemical and Pharmaceutical Science from the University of Sunderland and has over 15 years industrial experience in analytical chemistry. Paul started his career working in the pharmaceutical industry as a Bioanalyst before moving into contract research. He joined Unilever in 2004 and has subsequently completed a PhD with King's College London focussing on developing hyphenated analytical fingerprinting techniques for natural products. He is a technical specialist in liquid chromatography and mass spectrometry and has a specific scientific focus on the development of novel chemistry based approaches to aid the toxicological risk assessment of novel materials. Dr Russell has published a number of articles in the areas of bioanalysis, the analysis of natural products, and chemistry in risk assessment. He regularly presents at international conferences and is also Secretary of the Separation Science Group of the Royal Society of Chemistry.
