

Professor Tom Hutchinson has over 25 years' experience in the ecotoxicology and environmental risk assessment of natural and synthetic chemicals, principally with regard to agrochemicals and pharmaceuticals. He has recently moved to the University of Plymouth after working in a number of governmental and industrial research positions in both the UK and Sweden. He has published more than 100 peer-reviewed research papers relating to the freshwater and marine ecotoxicology, together with numerous technical reports on the environmental risk assessment of chemicals. He is a founder member and Chair of the SETAC Global Advisory Group on Endocrine Disruptor Testing and Risk Assessment (EDTRA) and has chaired and served on numerous scientific working groups for the OECD, European Environment Agency, European Science Foundation and ECETOC and was recently appointed to the UK government's Advisory Committee on Pesticides. His primary interests cover the population impacts of developmental and reproductive toxicants in fish and invertebrates from the perspective of protecting aquaculture resources and aquatic biodiversity. He is a Fellow of the Society of Biology and has a BSc degree in biology from King's College London and a Ph.D. in marine biology from the University of Plymouth. He is an Honorary Professor at Brunel University, UK and the University of Exeter, UK.
